

Agenda Item #3 (CIP)
Adopted 2024 CIP

This is the final version of the CIP adopted by the Planning Commission and City Council. This is the "baseline" document for the Planning Commission's review. The changes presented to the Planning Commission represent projects that are being added to, removed, or altered in this document.

City of Burlington Capital Improvement Program 2024

Approved - Ordinance 1942 - December 14, 2023

1 Introduction

1.1 Summary

This document is intended identify the capital expenditures necessary to maintain existing facilities and services, and to support growth and development over the next six years, and to identify the sources of revenue that will be used to pay for these facilities and services. Capital expenditures include investments in major infrastructure such as sewer lines, public buildings, fire-fighting equipment, and parks.

1.2 Planning Requirements

The City of Burlington is required by the Washington State Growth Management Act (GMA) to adopt, and periodically update, a comprehensive plan (RCW 36.70A.040). The GMA further requires that the City’s comprehensive plan includes a number of specific “elements”, including a capital facilities element (RCW 36.70A.070(3)). The capital facilities element of the City’s comprehensive plan covers a twenty year period and includes a forecast of future capital facilities needs based on projected population and employment growth (RCW 36.70A.070(3)(b) & WAC 365-196-415(b)).

Importantly, the capital facilities element of the City’s comprehensive plan must identify, at least conceptually, potential funding sources for any capital facilities needed to support population and employment growth for a twenty year period. In addition, a detailed financing plan identifying specific costs and sources of revenue for the first six years of the plan must also be included. This six year financing plan is often known as a Capital Improvement Program (CIP). The CIP is typically updated on an annual basis to adjust to changing budgetary conditions and to address the City’s most pressing infrastructure priorities.

1.3 Relationship to Comprehensive Plan and Annual Budget

By state law, all comprehensive plans must be “internally consistent”. For purposes of adopting, and updating, a CIP, this means that the same set of assumptions must be used throughout the plan. Because the need for capital facility improvements is directly related to population and employment growth, the City’s capital improvement program must be based on the population and employment forecasts use in the Land Use Element of the Comprehensive plan. For example, the City may not use one set of population and employment assumptions when developing a list of transportation improvements necessary to support growth, and a different set of assumptions when forecasting increases in potential revenue sources. All of the City’s activities, including the adoption of an annual capital budget must be consistent with the City’s comprehensive plan and CIP (RCW 36.70A.120).

2 City of Burlington Projects

2.1 Summary

The following pages describe the City's planned capital projects. Each capital project includes a description, information on timing, estimated project costs, and the source of funding that will be used to pay for the project. Information is also provided showing how each of the planned projects relates to the Burlington Comprehensive Plan.

Timeline

Start Date: 2029
Completion Date: 2029

Staff Information

Project Number: 2-2024-1		Date Received: 9-15-2023
Permits required: <input checked="" type="radio"/> Yes <input type="radio"/> No	Notes: Yes - More information needed; however required permits likely limited to building, electrical, and flood development. Generator anchoring points and enclosure require permit. Will need to be elevated at or above the FPE (flood protection elevation) for critical facilities (3' above flood)	
Studies required: <input checked="" type="radio"/> Yes <input type="radio"/> No	Notes: Yes - Licensed surveyor will be required. Existing ground elevation must be documented and an elevation certificate will be required to document compliance with FPE requirements. Coordinate with building official, fire marshal and State L&I for other permit requirements.	
Zoning change required: <input type="radio"/> Yes <input checked="" type="radio"/> No	Notes: No - City Hall/Public Safety complex are zoned PFT-1 (public facilities and transportation). Public facilities identified in an adopted capital plan are considered a permitted use.	
Applicant has a conforming capital plan? <input checked="" type="radio"/> Yes <input type="radio"/> No	Notes: Yes - Comp Plan	
Comprehensive Plan Consistency: Consistent - Explicitly Addressed: - Policy 6.4.2.3 states "design public facilities and infrastructure with a long term view to reduce future repair, maintenance, and servicing costs, and to protect public investments from natural disasters and other hazards.

3 Outside Agencies

3.1 Summary

To ensure a high level of coordination, and to ensure public facilities and services are timed to support growth and development, outside agencies with capital intensive programs are asked to prepare, and annually update, detailed capital plans covering at least a six-year period. These plans are reviewed for consistency with the Burlington Comprehensive Plan. A capital plan that has been reviewed and approved by the Planning Commission and City Council through the City's annual CIP adoption process is considered a "conforming plan". Conforming plans are "adopted by reference" and considered to be part of the City's CIP.

3.2 Education – Burlington Edison School District

Public education in grades K – 12 is provided by the Burlington Edison School District (BESD). BESD operates six schools, with total capacity of 3,210 students. Three BESD schools, including West View Elementary, Lucille Umbarger Elementary, and Burlington Edison High School, are located in the City of Burlington. BESD enrollment declined between 2013 and 2019 and BESD projects that this decline will continue through at least 2027. BESD's most recent capital plan covers a period between 2021 and 2026. The district's plan explicitly acknowledges that it does not address probable enrollment impacts stemming from ongoing development or the City's projected population growth. Because BESD's plan has not been updated annually, does not cover a six-year period, and is not based on the City's adopted population projects it is *not* considered a conforming plan.

3.3 Flood Control – Dike District 12

Dike District 12 (DD-12) provides flood protection infrastructure in the City of Burlington and surrounding areas. Structural flood protection measures in the City consist of a levee system along Skagit River and a pump station used to regulate water levels in Gages Slough.

DD-12 has a long-range plan to improve the Skagit River levee system through a program of levee setbacks and improvements. For the six-year period between 2024 and 2029, DD-12 is planning a levee enhancement project near the BNSF railroad bridge. This project will necessitate acquiring additional property. DD-12 estimates the project will entail property acquisition costs of \$3 million and construction costs of \$3.5 million. The levee enhancement work planned by DD-12 will require City permits and development approvals. In addition, any privately owned land acquired by DD-12 will need Comprehensive Plan and zoning map revisions.

The Dike District’s capital plan is consistent with the Burlington Comprehensive Plan and is considered a conforming plan.

3.4 Housing – Housing Authority of Skagit County

The Housing Authority of Skagit County owns property and provides subsidized housing services in the City of Burlington. The Housing Authority does not have a capital improvement plan and has not provided any information on planned capital improvements. The Housing Authority does *not* have a conforming capital plan.

3.5 Transit – Skagit Area Transit

The Skagit Area Transit (SKAT) provides public transit service in the City of Burlington. Five routes originate in, or pass through, the City of Burlington, including Route 80X which provides express commuter service from Bellingham to Mount Vernon, Route 208 which connects Burlington and Mount Vernon and provides service along the Burlington Boulevard/Riverside Drive corridor, a local circulator route, and routes serving the Anacortes and Sedro Woolley. Chuckanut Station, which includes a park and ride facility is a major hub for transit service in the City and provides convenient access to downtown Burlington and the Burlington Edison High School.

SKAT has indicated their current facilities are not adequate to handle anticipated growth. To address the agency’s needs, SKAT is constructing a new Maintenance, Operations, and Administrative facility. The new facility is located outside the City in the Bayview Ridge Urban Growth Area. When completed the facility will allow SKAT to operated electric buses and enlarge its vehicle fleet. SKAT plans to complete the new facility in 2024.

To address the City’s capital planning coordination requirements, SKAT provided a detailed capital plan covering a six-year period. SKAT’s capital plan is consistent with the Burlington Comprehensive Plan and is considered a conforming plan.

3.6 Water – Skagit Public Utility District

The Skagit Public Utility District (PUD) provides water service within the City of Burlington and throughout Skagit County. In addition to meeting the domestic water needs of Burlington’s residents, businesses, and public facilities, PUD also installs and maintains fire hydrants and ensures that adequate water capacity and pressure are available for firefighting purposes.

To address the City’s capital planning coordination requirements, PUD provided a detailed capital plan covering a ten-year plan. PUD’s capital plan is consistent with the Burlington Comprehensive Plan and is considered a conforming plan.

3.7 Skagit County

The Skagit County Public Works Department owns and operates a maintenance facility in the City of Burlington.

To address the City's capital planning coordination requirements, Skagit County provided a detailed capital plan covering a six-year plan. Skagit County's capital plan is consistent with the Burlington Comprehensive Plan and is considered a conforming plan.
